

CERTIFICATE

ZERTIFIKAT

DAHBI Yassine DAHBI

Yassine DAHBI

has successfully completed the e-learning course of the Erbe Academy

Electrosurgery - Functional principles and safe use

on 01. Nov 2025 and has passed the online test. The course covers the following topics:

Thermal tissue effects, functional principles of electrosurgery, monopolar and bipolar instruments, device settings, safe preparation of the patient, safe activation of instruments, troubleshooting

This certificate was created and issued automatically on the user name by the Learning Management System www.academy.erbe-med.com after successful completion of the test and is valid without signature. The system has been validated according to GAMP 5 standard. The course content and the test have been reviewed and approved. The online test is unlocked for the user only after he has completed reading the course. The test contains 15 random multiple-choice questions (type PkN). DAHBI Yassine DAHBI has confirmed with an electronic signature (user name and password) that the test was performed personally. The test is passed if at least 80 % of the maximum score has been reached. The certificate does not replace individual instructions and in-service training on the products actually used by the user.
